

WIN-PAK® with Web

Integrated Security Solution

Honeywell's WIN-PAK with Web software solution provides a cost-effective way to integrate and manage access control, video surveillance, and intrusion detection through a single interface. Building upon WIN-PAK's legendary and robust workstation-based management system, WIN-PAK with Web provides an intuitive browser-based interface allowing users to perform common access control actions from virtually anywhere.

WIN-PAK with Web can be easily scaled from a single site up to a multi-region, enterprise-level solution without placing restrictions on the number of users or sites being managed. WIN-PAK with Web supports third party integrations such as BioConnect® Suprema® biometrics, point-of-sale systems, visitor management, and HR applications. Using WIN-PAK'S API your software developers can create custom integrations to meet your integration needs.
